

Ngati Porou Whanui Forests is really keen on using all the 'brains' out there amongst young people on the East Coast. We want to invest much more in research and development to make our company grow. Just like the trees we look after!

Catalyst R&D Ltd also helps companies with research and development programmes. Now it wants to do more to encourage young people to get involved with 'hot' science.

High school students like you are making key decisions about your future. If you're interested in science, then we're keen to help you on your way!

So what we've done is to provide awards of \$750 each to help two high school students on the East Coast to become involved in activities which might make them think about a scientific career.

Some of the activities you could use the award for:

- attendance at a national science fair
- or science summer school
- or resources for a science based project

We are sure you can think of a lot more 'hot' science activities too...!

Application forms are available from your local High School. Applications close on June 30 2006 and will be awarded by July 31 2006.

Award applications to be sent to :
Catalyst R&D Ltd. PO Box 798, Tauranga
